

HEALTH SCIENCES

Degree Type

Associate Degree

Allied Health Science

Bachelor's Degree

Health Sciences

A Monroe University degree in the Health Sciences provides students with advancement opportunities into the health care professions through entry-level employment in a variety of healthcare environments. These include hospitals and medical centers, community health clinics, short- and long-term care facilities, provider offices, fitness and wellness facilities, insurance companies, and many more.

At Monroe, our highly skilled Health Sciences faculty are as diverse as the field itself. Graduates of each program will bring to their new positions a comprehensive understanding of the structure, function and organization of healthcare systems, along with a fully developed cultural competency that's responsive to an aging and diverse population.

Monroe's 64-credit associate degree can be completed in just four semesters – one and a half years – with most credits transferrable to the bachelor's degree. Flexible study options are available!

DID YOU KNOW?

- + Monroe's School of Allied Health Professions provides hands-on learning in state-of-the-art clinical labs that simulate real-world settings.
- + Students of both the AS and BS in the Health Sciences will gain real life experience as interns through field placements in a variety of professional environments.
- + The Bureau of Labor Statistics projects nearly 20% growth in Allied Health Professions through 2030, much faster than the average 4% growth rate for all occupations. During this same period, BLS projects 8% job growth in the fields of medical records and health informatics.
